AQUASHELL WATERPROOF PROTECTION

The newest innovation in waterproof and breathable Richa motorcycle clothing

HOW AQUASHELL WORKS

Richa Aquashell clothing is made by laminating a waterproof layer onto an extremely strong base layer, thereby making no compromises on comfort, protection, breathability or flexibility. Riders all over the world have been relying on Richa Aquashell protection in the most extreme weather conditions.

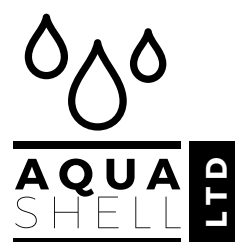

PROTECTION FOR ALL WEATHER CONDITIONS

A waterproof, windproof and breathable protective coating ensures your body can breathe while your body temperature is maintained at a comfortable level.

For: bikers who want good protection in all weather conditions.

Water column: 8,000 to 10,000 mm.

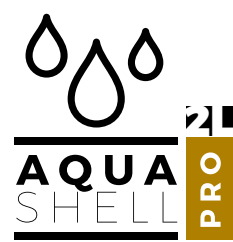

DETACHABLE PROTECTION FOR ALL WEATHER CONDITIONS

A waterproof, windproof and breathable inner layer is zipped into your protective motor clothing. In warm weather, you can easily zip off the waterproof inner layer to offer maximum ventilation.

For: touring bikers who want flexible protection in wind, rain or hot weather.

Water column: 10,000 to 15,000 mm.

FAST-DRY PROTECTION FOR EXTREME WEATHER CONDITIONS

Aquashell 2L PRO is made of two layers. A waterproof and water repellent layer is laminated onto a protective, windproof outer layer, protecting against wind, cold or impacts. The mesh lining behind the outer shell allows the fabric to breathe.

For: bikers who are often on the road in rainy weather and who want flexible protection in wind, rain or hot weather.

Water column: 15,000 to 20,000 mm.

STRONG, LIGHTWEIGHT, FAST-DRY PROTECTION FOR EXTREME WEATHER CONDITIONS

Aquashell 3L PRO is made of three layers. The sturdy outer fabric is extremely strong and wear resistant. A waterproof and water repellent membrane keeps the water out. A cotton lining protects your skin from wear and tear and transports any moisture away. These three layers are laminated together to form one strong, waterproof, fast-dry and comfortable fabric.

For: bikers who are often on the road in extreme conditions and who want the best protection, optimum comfort and ventilation.

Water column: > 25,000 mm.

D3O[®]

ABOUT D3O[®]

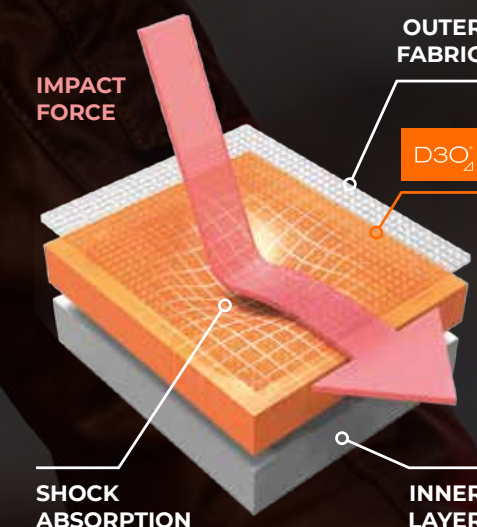

Nothing protects better than D3O[®]. D3O[®] offers the thinnest and most advanced protection against impact, with a wide range of level 1 and 2 CE EN1621 certified protection. Trusted by professional and amateur motorcyclists alike, D3O is the number one choice for impact protection delivering comfort, flexibility and fit, both on- and off-road.

So if they trust D3O – you can too.

HOW D3O[®] PROTECTION WORKS

D3O[®] materials are made using a combination of advanced polymer chemistry and cutting-edge design. The materials are soft and flexible, with no compromise on comfort, but react differently when force is applied.

D3O[®] absorbs and dissipates energy during an impact, reducing the amount of force transmitted to your body compared to standard foams.

D3O[®] Viper Stealth / Viper Pro / Viper Central Back protectors

D3O[®] CP1 Chest protector

D3O[®] T5 EVO X / T5 EVO Pro X Limb protectors

D3O[®] Ghost Limb protectors

HOW DO YOU CHOOSE THE RIGHT JEANS?

What is the difference between a casual jeans and a motorcycle jeans? And what is the difference between a motorcycle jeans with and without lining? Before you choose, it is better to get a good understanding of the different types of trousers and their benefits.

- There are roughly three types of motor jeans:
1. The casual jeans
 2. A protective motorcycle jeans with single layer technology
 3. A protective motorcycle jeans with a lining

THE CASUAL JEANS

The first type cannot longer be sold in the EU as motor jeans, although some riders still wear them on the bike. Their protection against impact and heat is minimal. If you want to hit the road safely, then you had better choose a protective motorcycle jeans with or without lining.

THE PROTECTIVE MOTORCYCLE JEANS WITH SINGLE LAYER TECHNOLOGY

Comparable to a casual jeans when it comes to fit and comfort, these trousers offer optimal protection on the bike. Cotton and aramide or Cordura® fabric are interwoven, resulting in a fabric that is as soft, supple and comfortable as denim. It is extremely abrasion, impact and heat resistant. Consisting of only one layer of fabric, they are nice to wear on very warm summer days. They are equipped with D3O® protectors at the knees and oftentimes at the hips as well. They are finished with safety stitching.

Advantages: comfortable, light and offering premium protection.
For: bikers who want the comfort of a casual jeans and the optimal protection of a motorcycle jeans.

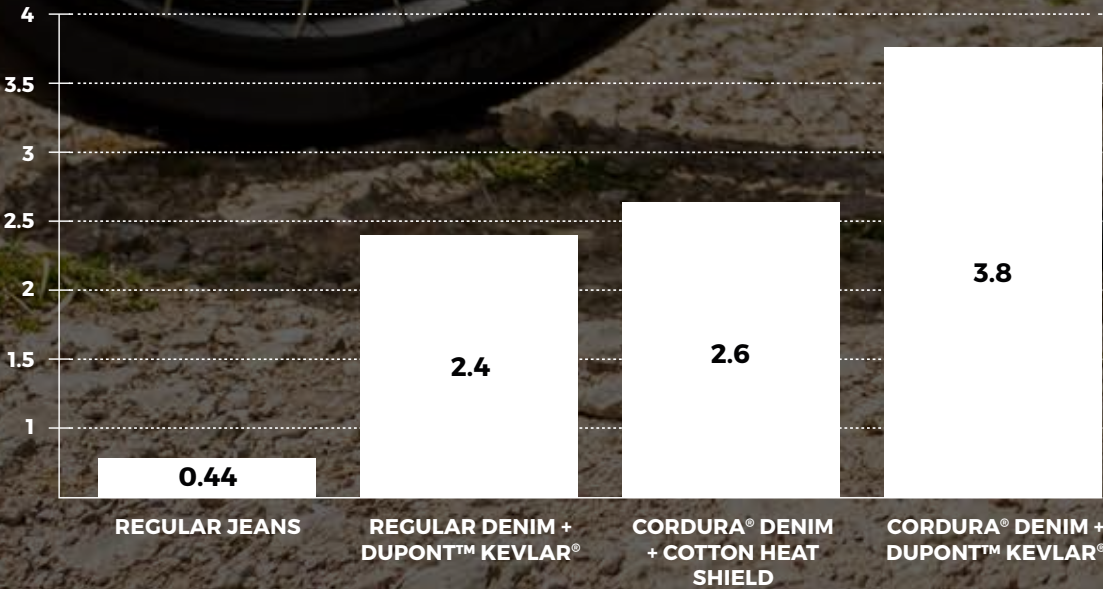

THE PROTECTIVE MOTORCYCLE JEANS WITH A LINING

These trousers have two layers. The outer shell is made of cotton. The inner lining is made of sturdy synthetic fibers, mostly aramide, of which Dupont™ Kevlar® fiber is probably the most well-known. At impact, the inner layer protects your body. The production costs of a motorcycle jeans with a lining are lower, which makes them very affordable. They are equipped with D3O® protectors at the knees and oftentimes at the hips as well.

Advantages: comfortable, affordable and offering premium protection.
For: bikers who want the optimal protection of a motorcycle jeans in warm and in colder weather.

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

HIGH-TECH COMFORT FOR YOUR HANDS

If your hands get cold even while you are wearing gloves, it's often caused by moisture in the insulation. It may come from the outside if the gloves aren't waterproof or from the inside if they trap perspiration because they don't breathe. Reliable breathable protection is why GORE-TEX® gloves are the choice of winter athletes, adventurers or motorcyclists.

GORE-TEX® GLOVES TECHNOLOGIES

All gloves engineered with GORE-TEX® inserts are durably waterproof, windproof and breathable – guaranteed. For consumers seeking additional features, we offer five different product technologies to fit their specific needs.

GORE-TEX® Gloves

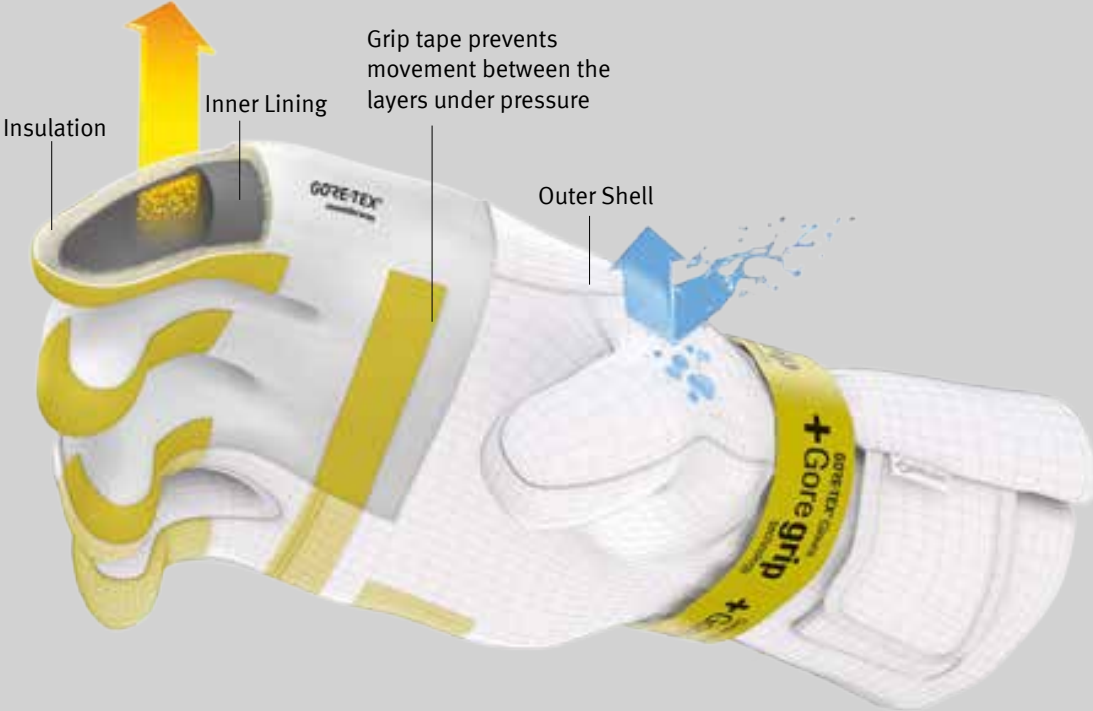

**PROTECTION AND COMFORT.
WATERPROOF AND BREATHABLE.**

Water stays on the outside while perspiration can easily escape from the inside. Less moisture is trapped in the insulation, so it remains drier and keeps hands warmer. The result: enduring weather protection and personal comfort, balanced heat transfer and optimum moisture management. Your hands stay warmer when it's cold, and drier when you perspire.

GORE-TEX® Gloves **+Gore grip** technology

**OUTSTANDING TACTILITY.
SURE GRIP.**

These gloves offer the feel of direct grip and high tactility. The innovative combination of these characteristics has been made possible by a special layered construction which attaches the normally loose layers of the glove to each other, preventing movement between them. They provide optimum tactility and better dexterity for a sure grip. This makes it easier to handle poles, handlebars, zippers, goggles, etc.

MOUNTAIN GORE-TEX® GLOVE

A man with curly brown hair and a beard is shown from the chest up, wearing a dark navy blue rain jacket with bright yellow-green reflective stripes. The jacket features a high collar, a black strap across the chest, and a buckle. On the right sleeve, there is a circular logo and a yellow-green stripe with the text "GORE-TEX". The background is a blurred outdoor setting.

- Mild soap for cleaning and conditioning leather
- Removes stains from leather garments

TECHNOLOGIES AND FIT EXPLAINED

For men.

For women.

For men and women. The women's clothing has a ladies' fit.

Regular fit: the classic motorcycle clothing fit.

Slim fit: fits closer to the body for a smart, modern look.

V-cut: broad shoulders, pre-curved sleeves and a narrow waist give a sporty look.

Loose fit: allows for more space around the arms and body or around the legs.

Gore-Tex® is a 100% waterproof, windproof and highly breathable outer shell, offering unsurpassed durable wearer comfort.

Waterproof protection for all weather conditions (see page 6 for more detailed information).

Waterproof, detachable protection for all weather conditions (see page 6 for more detailed information).

Waterproof, fast-dry protection for extreme weather conditions (see page 6 for more detailed information).

Waterproof, strong, lightweight, fast-dry protection for extreme weather conditions (see page 6 for more detailed information).

Three-layer jackets and trousers have an inside detachable waterproof membrane and a detachable thermal liner.

Two-layer jackets and trousers have an inside detachable waterproof membrane or a detachable thermal liner.

Richa® Air Ventilation / Circulation System with mesh panels, air vent zippers ...

Richa® Contra Glide Technology prevents sliding over the seat (anti-slip).

Scotchlite™ Reflective Material greatly enhances your safety at night and in low visibility situations, by reflecting an extremely bright image back to the light source.

Dupont™ Cordura® is a high-tech fabric made of polyamid fibre. It has an airy structure. It meets the highest standards in terms of strenght and durability, while remaining light and stylish.

SuperFabric™ is five times more abrasion-resistant than leather, with just half the weight. Multiple protective shields are applied close to each other within the fabric, but they remain separate to allow maximum flexibility. The micro guard plates provide an additional layer of protection, without adding weight, and help prevent abrasion to underlying fabrics.

From Moto GP to on- and off-road motorcycling, D3O® delivers a wide range of Level 1 and Level 2 CE EN1621 certified protectors. It is the number one choice for impact protection that also provides comfort, flexibility and fit.

Powertector® provides high-quality CE certified protectors for power sports and action sports. CE EN1621 certified protection.

YKK® Vislon® front zippers are made with delrin plastic teeth molded to the fabric tape edges. They are strong and can resist practically any weather condition, having been designed to resist damage from ultraviolet rays and corrosion.

More passive safety with a more comfortable stretch material. It is extremely comfortable thanks to the highly elastic outer material.

Primaloft® Gold is made with microfibers which store body heat in a remarkably light material that affords good grip.

3M Thinsulate™ insulation is warm yet lightweight, powerful yet thin. It helps to trap body heat, while allowing moisture to escape.

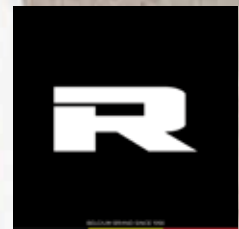

Easily wipe your visor dry with your left hand glove, thanks to a special fabric integrated in the glove.

Use your smartphone or navigation system without taking your gloves off, thanks to conductive material on the index finger and thumb of your right hand glove.

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.
